

WESTERN AUSTRALIAN HARDWOODS

sustainable timber solutions

Western Australian jarrah has developed an international reputation as one of the finest hardwoods in the world. Its beautiful appearance and quality finish combined with its strength and durability makes it a highly prized timber that has long been synonymous with the Australian furniture industry since Western Australia's early beginnings.

Hardwoods are usually the material of choice for high quality designed furniture and a natural choice for designers and manufacturers. Western Australia's world class hardwoods are beautiful and diverse with colours ranging from the earthy red shades of jarrah (*Eucalyptus marginata*), the pinkish-orangy hues of karri (*Eucalyptus diversicolor*), to the delicate honey tones of marri (*Corymbia calophylla*).

The Forest Products Commission proudly supports the State's forest and furniture industries by promoting design excellence using Western Australia's sustainably managed native hardwoods.

"What better way to showcase the true beauty and qualities of Western Australia's unique hardwoods to national and international buyers than by promoting our State's reputable and emerging native timber furniture designers, manufacturers and timber suppliers," said General Manager, Vince Erasmus.

"Our objective is to demonstrate the strength and versatility of our hardwoods for use in contemporary furniture. Visit stand 1042 to see the stunning jarrah wall art by [Kyoto Designs](#) and naturally featured jarrah floating coffee table designed by [Floating Edge Design](#). You will be intrigued by a web-inspired marri hall table designed and made by [Simon Parsons of SP Furniture](#) along with two fully functional, lightweight but robust karri chairs designed by students, Malisa Benjamins and Harry Reynoldson from the [Faculty of Architecture Landscape and Visual Arts](#) at the University of Western Australia."
